DIRECTOR, FBI

PERSONAL AND CONFIDENTIAL

EUPLANS

OAUXILIARY OFFICE FOR S.O.B.

Reference is made to Bureau letter dated July 16, 1956, in which certain information concerning the Special Agents' Insurance Fund and the Charles S. Ross Fund was set out. Since, in accordance with Bureau instructions, these records are now being maintained at [redacted] this information is being directed to you for inclusion in the confidential records repository. b7E

By letter dated July 30, 1952, the Bureau transmitted a schedule of bonds purchased for the Special Agents' Insurance Fund and the Charles S. Ross Fund to the Omaha Office and the above schedule is now in possession of your office. The schedule of bonds referred to above is no longer up-to-date and there is contained herein a listing of all bonds purchased for the Special Agents' Insurance Fund and the Charles S. Ross Fund:

As of the close of business June 30, 1957, the Special Agents' Insurance Fund maintained the following accounts:

BANK	BOOK NUMBER	AMOUNT
Alexandria National Bank	4123	$ 963.73
American Savings and Loan Association	27932	9,290.31
American Security & Trust Company	55314	686.00
Bank of Maryland - Bowie Branch	B-1339	8,005.84
Capital City Savings & Loan Association	S-155937	8,831.34
Citizens Federal Savings & Loan Association	13	8,785.33
City Bank	20210	2,124.14
Columbia Federal Savings & Loan Association	P-1999	8,787.84
Enterprise Federal Savings & Loan Association	S-7749	3,293.55
Home Federal Savings & Loan Association	S-2454	14,280.01
Interstate Building Association	E-54-134	3,998.41
Liberty Building Association	11715	177.57
Liberty National Bank	33645-A	8,796.00
Metropolis Building Association	8683	5,475.08
National Permanent Building Association	38-470	191.49
Perpetual Building Association	122-1287	3,258.20
Prudential Building Association	12415	9,297.06
Riggs National Bank	2-7119	66,374.35
Washington Permanent Building Association	34-273	7,143.29
	TOTAL	$ 183,737.84

For record purposes there is attached hereto a copy of changes, additions and deletions made on Bureau personnel whose home telephone numbers are on line load control, the original of which today was furnished to [redacted] of the Government Service Group handling this program at the C. and P. Telephone Company. With the number of deletions made we now have brought down the total number of Bureau persons, including Washington Field Office, whose telephones are included in the program to 356. There should be few significant changes made hereafter as the group is now stabilized and covers largely Bureau personnel and alternates who are scheduled for immediate evacuation to [redacted]

SUBJECT: DEFENSE PLANS - EVACUATION
BUREAU WAR PLANS EMERGENCY HEADQUARTERS

Reference is made to previous monthly memoranda setting forth the status of unfinished items being considered in connection with Seat of Government relocation plans.

FOR S.O.G.

RELOCATION SITES:

By memorandum 4-2-57 the Laboratory reported the results of a survey of field office relocation sites as affected by possible radioactive fall-out which might result from nuclear attack on prime target areas. Fourteen offices affected were informed by airtel to seek relocation sites in other areas.

By memorandum 8-9-57 the Laboratory advised that all fourteen offices have now selected satisfactory areas for relocation sites and have completed local negotiations for use of the selected spaces. This phase of the Seat of Government relocation plans is now complete.

ACTION:

For information.

SUBJECT: BUPLANS - FIELD OFFICES' TERRITORIAL ALLOCATION MAPS AT [redacted] b7E

Memorandum Belmont to Boardman 9/8/55 "War Plans - Relocation" approved preparation and maintenance at [redacted] of folders containing maps showing territorial allocation of each Field Office. Maps were to be used for tabulating information for ready reference as to fallout and bomb damages in each Field Office territory.

Current methods of plotting fallout and bomb damages by Laboratory in damage assessment work utilizes specially prepared maps, therefore, the folders originated by referenced memorandum serve no useful purpose and should be destroyed.

RECOMMENDATION: ~~which are maintained at~~ [redacted] b7E

Folders containing maps showing territorial allocation of each Field Office maintained at [redacted] be destroyed.

Maps sent to Mrs. Gallagher - 9/23

At 2:44 P. M. a [redacted] who identified himself as being with the [redacted] telephonically contacted Supervisor Minnich, Defense Plans Desk, Liaison Section and inquired whether the Bureau would participate in a "CCPX" (Communications Practice Exercise) from our relocation site on Wednesday and Thursday, 9/18 and 9/19/57. [redacted] was told possible participation would be checked and he would be telephonically advised.

[redacted] Communications Section, telephonically contacted Major [redacted], who advised exercise in question is one involving operational exercise from main headquarters [redacted] is not an Office of Defense Mobilization sponsored exercise and does not require participation but is only for those agencies having regularly manned facilities. Major [redacted] stated he did not know [redacted] but would pass the information along to [redacted] as to whether or not the Bureau would participate in the exercise.

b6
b7C
b7E

OBSERVATIONS:

Our communication facilities were thoroughly tested during Operation Alert, 1957, (7/12 through 7/19/57) and we will, of course, periodically test communication facilities each month as we have during the previous year which will assure their efficiency and availability in the event of an emergency. Communications Section advises participation in the test would require sending three code clerks, two teletype operators, one telephone operator, one supervisor, and a chauffeur, total nine employees to [redacted] on the dates in question. Communications Section advises personnel not available on short notice for participation in this exercise due to employees on annual leave and necessity for carrying on efficient communication activities at Seat of Government.

On September 16, 1957, Mr. Bartlett of the Liaison Section attended a meeting of the Interagency Planning Group at the Office of Defense Mobilization (ODM). The chairman of this meeting was [redacted] from ODM. This was the first meeting of the group since Operation Alert 1957 and it was suggested by [redacted] that from now on the group will meet every other Monday at 2:30 p.m. at ODM.

b6
b7C

During the discussion, representatives of several agencies mentioned items which could be improved during additional tests. One suggestion was made which would call for a basic operations manual which would serve the Operations Alert and would be good from year to year. [redacted] said that consideration would be given to this thought.

b6
b7C

Regarding the cost of Operations Alert held in the past, several agencies commented that they were unable to request additional money in their budget requests and that in some instances it was difficult to absorb the costs. One member of this group said he understood that Operation Alert 1957 cost $3,000,000. A representative from General Services Administration mentioned that travel and per diem costs alone for his agency was $90,000.

[redacted] of ODM advised the group that Lieutenant General [redacted] (USMC Retired), Assistant to the Director for Plans and Readiness, ODM, was leaving ODM at the end of September, 1957, and that no announcement concerning his successor has been made.

SUBJECT: BUREAU WAR PLANS
CHEMICAL AGENT DETECTOR KITS

Reference my memo dated July 25, 1957, concerning the purchase of two chemical agent detector kits.

The two chemical agent detector kits designated as E-28 kits have been received in the Laboratory. As pointed out in the referenced memo, one of the kits is being sent to [redacted] and the other kit is being maintained in the [redacted] It will be necessary for a chemist to use the kits because of the fairly complicated nature of the testing equipment. The [redacted] kit will be placed with the trunk containing secret ink materials at [redacted] and will be checked at six-month intervals when the secret ink trunk is checked. b7E

SA J. William Magee or myself would operate the [redacted] kit in the event of an emergency. SA John E. Houlihan is familiar with the operation of the detector kit and would make any necessary tests in the Laboratory in the event both Magee and myself would be at [redacted] because of the evacuation of key personnel to the relocation center. b7E

SUBJECT: DEFENSE PLANS - RELOCATION SITES
KEY AGENCIES (COLORED CHARTS)

(Memorandum Roach to Belmont 9/10/56 denotes that on 9/5/56 colored charts classified ~~"Top Secret,"~~ entitled "Relocation Sites - Key Agencies," were distributed as follows: Director's office - 2, Mr. Nichols' office - 1, Mr. Boardman's office - 1, Mr. Belmont's office - 1, SAC, [redacted] b7E

The charts show geographical relocation sites of key agencies with which we normally do business and were last revised 11/16/56. The charts now require revision, which is a rather lengthy and expensive process. In our defense planning we keep up to date, distribute and utilize a similar chart which is in black and white.

OBSERVATIONS:

Since the colored charts are approximately 24" by 20" in size and classified ~~"Top Secret,"~~ they cannot be displayed, but must be kept in a safe storage space, where they are not available for ready reference. The size of the black and white chart permits its retention in the "Defense Plans - Brief of Evacuation and Relocation Plan," where it is available for ready reference.

RECOMMENDATION:

That the colored charts not be revised and existing copies be destroyed by the possessor as set forth herein.

SUBJECT: CHECK OF LIAISON RECORDS AT RELOCATION SITE
DEFENSE PLANS

On 9/11/57 I made a personal check of the Bureau Defense Plans records at [redacted] which are the responsibility of the Liaison Section. I found these records to be maintained in excellent order. All material supplied to [redacted] had been properly indexed and filed, and on a current basis. These records will be rechecked during the first half of the calendar year 1958. b7E

The manner in which the Bureau's Defense Emergency records are kept at [redacted] is worthy of further comment, with particular reference to Clerk [redacted], who has been designated by the SAC for the purpose of filing, indexing, maintenance, and general clerical handling of these records. It was noted during the recent and prior checks of this material that [redacted] has displayed an unusual amount of initiative. He is very alert to seeing that the records are promptly and properly filed. His obvious ability to handle these important records over a sustained period of time demonstrates that he is highly capable in this assignment. There is no doubt that [redacted] is doing an outstanding job. b6 b7C b7E

ACTION:

The above is submitted for information and record purposes.

On October 10, 1957, [redacted] of the Liaison Section talked with [redacted], who is in charge of Operations Alert for the Office of Defense Mobilization (ODM). [redacted] asked [redacted] if ODM was planning any surprise tests for agency participation between now and Operation Alert - 1958. [redacted] advised that no surprise tests were being planned. He mentioned that to run a surprise test would be a terrific inconvenience to the personnel in the agencies participating as well as to some of the facilities used for relocation tests such as [redacted]

[redacted] then mentioned to [redacted] the possibility of running a shorter annual test in the future such as a concentrated test to run for two or three days. [redacted] said it was his opinion that the next Operation Alert would be probably the same length of time as the 1957 test but due to the fact that there is still international tension, and further that in some of the wartime agencies which would come into being during an emergency it would take the full week of testing to do any good. [redacted] advised [redacted] that the FBI was so set up that we could go into an emergency operation within minutes and that this held true for our participation in Operations Alert; that the FBI could participate in a test for two or three days and in doing so run a sufficient test so that we would be satisfied that we had the situation well in hand and the remainder of the week could be more profitably spent back at our offices handling our normal business. Mr. Bartlett explained that the FBI responsibility in the event of a real emergency would be focused on the early stages; that following this all important operation, we would then fan out into our normal wartime duties; therefore, the Bureau, as distinguished from operations dealing with food, manpower and defense stockpiling, could test its readiness in the first two or three days. [redacted] stated that an exception might be possible; however, he is unable to make any commitments at this time and that this problem can be taken up later as we get closer to the 1958 test.

This discussion by Liaison with ODM was a preliminary inquiry. If a long test is again scheduled for 1958 it may be advisable to go to the Attorney General at the appropriate time and get from him authority to cut the Bureau's participation time to two or three days after which we will advise ODM what we are doing.

SUBJECT: BUPLANS - VITAL RECORDS AT [redacted] b7E

Records considered vital to Bureau emergency operations maintained at [redacted] for safe keeping are listed in the document, "Highlights of Seat of Government Defense Plans for Chain of Command." Records so listed do b7E not indicate Divisional and Sectional responsibility as to annual or semiannual inspection to insure proper maintenance. Periodic changes involving these records are sent to [redacted] so as to keep the records current. To insure that changes are correctly made, periodic inspection of the records is necessary and Divisional Buplans coordinators should be reminded of this necessity.

To insure that additions and deletions are correctly made, contact was had with Buplans coordinators of other Divisions and it was agreed inspections as listed below are necessary and desirable. Inspections where not already conducted will be conducted by each Division on the basis set out below.

b7E

Vital records now at [redacted] and frequency of inspection to insure currentness and proper maintenance by respective Division are as follows:

Identification Division

1. Photographs of FBI personnel fingerprint cards. (On microfilm, not purged upon termination of employment. New roll added for every 1000 new employees.)

2. Microfilm of fingerprint card of each individual on the Security Index on whom a Security Flash Notice has been placed. (Last roll of microfilm in Washington sent to [redacted] as soon as completed.) b7E

(These records are checked annually by a representative of the Identification Division.)

Training and Inspection Division

1. A copy of lecture outlines used by the Training and Inspection Division in all types of Bureau Training (Checked semiannually by Training and Inspection representative).

Administrative Division

1. Records relating to Special Agents' Insurance Fund and Charles S. Ross Fund (New letter incorporating all information sent down once each year).

2. One hundred Government Travel Requests (Number is constant, never increases or decreases).

(These records are checked semiannually by Administrative Division representative.)

Records and Communications Division
Statistical Section

1. Copy of Bureau Payroll (New copy sent down every two weeks).

2. Bureau's personnel retirement records (end of every year new microfilm sent down and old one destroyed).

(Not necessary to check semiannually.)

Records Branch

1. A set of operating manuals of the Records Branch, including a Working Guide for Emergency Operations of the Branch. (Revisions are sent down for filing and the manuals are checked by Records representative semiannually.)

Communications Section

1. Communications Operations Instructions as provided by ODM.

2. Ten copies, Radio Operator's Manual, Part I.

(These records are checked semiannually by Communications representative.)

Domestic Intelligence Division

Espionage Section

1. Photostat of suggested draft agreement between FBI and Office of Censorship dated June 13, 1957.

2. A concise summary of the program calling for Detention of Enemy Diplomats (Prodip) including separate folders:

A. A copy of the monthly listing of Soviet bloc officials and their dependents in the United States.

B. A copy of the list of dangerous aliens attached to international organizations.

C. List of Arab Official Personnel in U.S. (Egypt, Jordan, Syria, Yemen).

D. List of personnel and priorities (list of persons for priority taking into protective custody and personnel requirements of N. Y. and WFO to handle.).

3. Duplicate assignment cards of cases and matters supervised by the Espionage Section.

4. A copy of the summary of Soviet and satellite espionage activities in the United States.

5. Atomic Energy risk list (Microfilm).

6. Chinese communist activities in the United States (List of alien warrants).

(These records are checked semiannually by a representative of the Espionage Section.)

Internal Security Section

1. Key Facilities List as furnished by Secretary of Defense.

2. Semiannual summaries of the activities of the Communist Party.

 b7E

3. Security Informant Index cards.

4. Microfilm of assignment cards of pending cases in the Internal Security Section.

(These records are checked semiannually by Internal Security representative.)

Subversive Control Section

1. One copy of the Attorney General's original portfolio and a revised copy of the Attorney General's portfolio.

2. A concise summary of the Emergency Detention Program (Detpro).

3. A copy of the security index cards.

4. A copy of the list of places to be searched under the Master Search Warrant.

5. A copy of the Emergency Detention Program survey of each field office setting forth administrative plans each office has formulated to place the program into operation.

6. A set of No Number SAC Letters relating to instructions in connection with the operation of the Emergency Detention Program since 1950.

7. A copy of the Security Index list.

(These records are checked semiannually by Subversive Control representative.)

Liaison Section

1. Copy of Defense Plans of each Executive Office and Division at Seat of Government and of each Foreign Liaison office.

2. An index reflecting the identity of and brief information concerning all informants used by Legats abroad.

3. Copy #16 - Highlights of Seat of Government Defense Plans for Chain of Command.

4. Emergency Procedures - Department of Justice.

b7E

5. Essential IIC records.

6. Card index showing Chain of Command and relocation site of each field office.

7. List of relocation sites of other agencies.

(These records are checked semiannually by representative of Liaison Section.)

Laboratory Division

Electronics Section

1. Frequency assignment for Government Radio Station (Bound Volume replaced upon issuance of new volume).

2. Frequency assignment of non government radio station (Bound Volume replaced upon issuance of new volume).

3. Mobilization Plan i X-2- List of frequencies above 27.5 megacycles to be used in periods of mobilization (Revised pages filed by representative of Electronics Section at which time it is inspected).

Cryptanalysis - Translation Section

1. Cryptomaterials, authentication charts, and Conelrad Pads (Checked and Inventoried once a month).

Physics - Chemistry Section

1. A trunk packed with chemicals and apparatus for secret ink work (Checked semiannually by Lab representative).

Document Section

1. Photographic copies of handwriting specimens of individuals on the key figure list.

2. A duplicate copy of the typewriters standards file. (Both checked semiannually by Document representative.)

ACTION:

None, for information of Divisions concerned.

Memorandum Belmont to Boardman 10/15/56, based on request from WFO, contains approved recommendation for second payment of $100 out of Confidential Fund to [redacted] Previously, Executive Conference on 6/30/55 recommended [redacted] be given $100 for out-of-pocket expenses and splendid cooperation in connection with his making available [redacted] as relocation site for WFO and auxiliary relocation site for Seat of Government. A teletype machine and telephone are installed in [redacted] as part of our emergency communication system. These requests with subsequent approval, pointed out [redacted] had made no request for reimbursement; however, he had made phone calls to SAC, WFO, on occasions, used his personal car on Bureau's behalf, was exceptionally cooperative during Operation Alert, 1956, and continued to personally handle on a most confidential basis all matters relative to WFO's contemplated use of [redacted] as a relocation site. WFO letter 10/21/57 refers to previous communications and suggests [redacted] authorization for payment of $100 be made to [redacted] for his cooperation in connection with Operation Alert, 1957, on other occasions when contacted and for reasons used as basis for 1955 and 1956 payments.

b7E

ORIGINAL FILED IN

OBSERVATIONS:

[redacted] as a relocation site differs from other contemplated relocation sites in that we have equipment stored [redacted] thus denying use of this [redacted] and $100 per year is cheap room rent. Additionally, [redacted] continued interest in our behalf insures the confidential character of WFO's relocation site.

b7E

RECOMMENDATION:

Attached letter be sent to WFO authorizing payment of $100 to [redacted]

SUBJECT: BUPLANS - SURVIVAL IN NUCLEAR WAR AND OPERATION ALERT 1958

During previous week (November 11 to 15, 1957) the annual fall conference of the National Association of State and Territorial Civil Defense Directors (NASTCDD) was held.

According to press releases and editorials, State Civil Defense Directors called for an immediate start on plans for Atomic Shelters. Leo A. Hoegh, Administrator, Federal Civil Defense Administration (FCDA), stated he considers shelters "essential" to an adequate civil defense. Also Hoegh reportedly has recommended to President Eisenhower a 34 billion dollar program for construction of shelters which could also be used for schools, hospitals, or parking garages. This statement plus others on Shelters vs. Evacuation by persons associated with civil defense formed the basis for editorial comment that the emphasis has swung from evacuation to shelters; further, that evacuation is now outmoded because of the short time it takes for an ICBM to reach the United States, and , in the absence of a shelter program, we must rely on evacuation even though we are not equipped to handle evacuees.

In connection with a possible Operation Alert 1958, an Office of Defense Mobilization (ODM) official advised the NASTCDD that the objective of next year's operation alert exercises would be to develop a maximum degree of realism, and tentative plans call for an assumed nuclear attack after three to four hours warning.

ACTION:

None. Buplans Desk will follow FCDA and ODM releases and advisory bulletins regarding Shelters vs. Evacuation and Operation Alert 1958 plans.

Re memorandum Belmont to Boardman 11/27/57 which set forth results of Inter-Agency Planning Group (IPG) meeting which was held 11/25/57 to discuss revised guidance document dated 11/25/57 re Operation Alert 1958 (O/A 58). Document and meeting indicated Office of Defense Mobilization (ODM) intent is to have a three-phase exercise -- Phase I - "Attack Phase" early in May involving state and local Civil Defense with possibility of some Federal involvement; Phase II - "Federal Action Phase" to occur Monday, 7/14/58, through Friday, 7/18/58, with field relocating on 7/14 and 15/58 and the Seat of Government relocating on 7/16, 17, and 18/58; Phase III - "Seat of Government Phase" to take place 8/4, 5, and 6/58 with top-level representatives convening at ODM site [redacted] to discuss and resolve problems growing out of phase one and two exercises. b7E

IPG meeting held 11/27/57, presided over by [redacted] Testing Officer, ODM, and attended by Supervisors Fitzgerald and Minnich, Liaison Section.

IPG members commented re wording of guidance paper and Department of Defense representative, supported by Joint Chiefs of Staff representative, commented re not having a Federal Operation Alert 1958, instead favoring one every other year. [redacted] voiced personal opinion operation alerts every year are necessary and productive, however, Department of Defense representative was very insistent that [redacted] call to the attention of Gordon Gray, Director of ODM, that the Secretary of Defense at the Cabinet meeting for discussion of Operation Alert 1958 may very well speak out in opposition to an exercise in 1958. Also, Department of Defense representative stated he doubted that the President is aware of all the pros and cons re alert exercises and that Gray, in presenting alert paper to the Cabinet, should make known to the President and to the Cabinet both sides of the problem. b6 b7C

INDEXED - 17 RECORDED - 17 62-117371-2018

Comments re participation by "top men" in phase three at [redacted] were generally in favor of not requiring "top men" but permitting deputies or assistants closely associated with defense planning to participate and handle this phase. b7E b6 b7C [redacted]

THREE

response to these comments was in effect that ODM has a technique for assuring "top-level participation" i.e. a personal invitation-type affair such as took place subsequent to Operation Alert 1957. [redacted] *did clarify participation in phase three by field representatives, pointing out this was only meant to apply to Army area commanders, chairmen of regional mobilization committees and regional directors for Federal Civil Defense Administration, a limited group. The Department of Justice representative suggested dates for phase three be changed to the middle or latter part of September, 1958. Some support was voiced for such a change and* [redacted] *indicated it would receive serious consideration.*

b6
b7C

Comment was also made re having new and different agency personnel participate in O/A 58 rather than using personnel who participated in past exercises. [redacted] *indicated this would be considered in connection with objectives of O/A 58.*

b6
b7C

Meeting concluded with [redacted] *pointing out he would prepare and disseminate an information paper prior to next meeting of IPG which he tentatively scheduled for Monday, 12/9/57, time and place to be announced. He indicated this would be last meeting prior to preparation of Cabinet paper which he hoped to have prepared in time for discussion at the Cabinet meeting scheduled for 12/13/57.*

ACTION:

None. For information. You will be advised of results of next meeting.

Re memorandum Belmont to Boardman 11/21/55 setting forth results of Inter-Agency Planning Group (IPG) meeting 11/20/57 which was held to discuss a guidance paper for Operation Alert 1958 (O/A 58) planning. Memorandum also noted meeting concluded with a decision to appoint a steering committee to consider all questions raised and to revise the guidance paper.

IPG meeting held 11/25/57 and in absence of [redacted] Assistant to the Director for Plans and Readiness, Office of Defense Mobilization (ODM), it was presided over by [redacted] Testing Officer, ODM, and attended by Supervisors Fitzgerald and Minnich, Liaison Section. Revised document dated 11/25/57 re O/A 58 was handed out at meeting and is attached.

b6
b7C

The meeting was again inconclusive being punctuated by parried or unanswered questions. Analysis of the document and comments made at meeting indicate probable intent of ODM re O/A 58 is to have a three-phase exercise:

Phase I - "Attack Phase" To occur early in May with exact time determined by state directors of Civil Defense.

[redacted]

b7E

Phase II - "Federal Action Phase" To occur Monday, July 14, through Friday, July 18, field and regional play being initiated on Monday, 7/14/58, from relocation sites to run for two days with SOG relocating on 7/16/58 to continue the operation with the field through Friday, 7/18/58. The intent here was

Re memorandum Belmont to Boardman 11/29/57 which set forth results of Inter-Agency Planning Group (IPG) meeting which was held 11/27/57 to further discuss wording of guidance paper for Operation Alert 1958 (O/A 58).

IPG meeting held 12/9./57 presided over by [redacted] b6 b7C Testing Officer, Office of Defense Mobilization (ODM) and attended by Supervisors Fitzgerald and Minnich, Liaison Section.

"Discussion Paper -- Operation Alert 1958" dated 12/9/57 with attachment, "Program Memorandum X," dated December 20, 1957, distributed at meeting (copy attached). Contents these documents practically identical and they relate to the purposes, objectives, and phases of O/A 58. [redacted] b6 b7C advised concept of O/A 58 has been accepted, however, contents of documents not approved by Director of ODM as yet. If Director, ODM, approves contents, a Cabinet paper will be prepared for presentation at next Cabinet meeting.

Analysis of documents coupled with comments of IPG participants indicates O/A 58 will be in three phases, i.e., Phase I - Attack Phase: May 6 and 7, 1958. [redacted]

[redacted] Phase II - Federal Action Phase: July 14-18, 1958, played by Federal agencies at field, regional, and departmental levels. [redacted] b7E

[redacted] Phase III - Seat of Government Phase: During period August 4, 5, and 6, 1958, or September 8, 9, and 10, 1958, dates not established as yet, which will require [redacted]

Memorandum Mr. Belmont to Mr. Boardman
RE: OPERATION ALERT 1958

The meeting was short with most comments dealing with semantics in the documents with exception of Department of Defense representative again voicing official opposition to a Federal exercise in 1958 and the Department of Agriculture representative voicing official objection to having field personnel relocate for five days. [redacted] responded to both objections with a curt statement to the effect that the Directors of the National Security Council and ODM feel exercises and relocation phases thereof are necessary.

b6
b7C

[redacted] said ODM is unable to agree on time element phasing between phase one and two, that is whether it would be a D plus 1, 10, 15, etc. situation which, of course, is extremely necessary for adequate planning. [redacted] did not schedule additional meetings of IPG but indicated meetings will be held after acceptance of Cabinet paper.

OBSERVATION:

Planning for our participation in O/A 58 at this time would be premature.

ACTION:

None. For information. You will be kept advised.

SUBJECT: BUPLANS - RADIOLOGICAL DEFENSE OF EMERGENCY RELOCATION SITES (RDERS)

Letter dated 10/14/57 from Victor E. Cooley, Acting Director, Office of Defense Mobilization (ODM), to Director forwarded by routing slip dated 11/7/57 to Liaison Section (received in Liaison Section 11/13/57) by [redacted] ODM. Routing slip advises letter was sent to all Departments and Agencies on ODM Continuity of Government List; that FBI is on list and [redacted] apologizes for not sending letter to Director with assurance it will not happen again.

b6
b7C

Contents of letter relates that in recognition of hazards of radioactive fall-out, an Interagency Committee (IC) on RDERS was established upon recommendation of the Defense Mobilization Board to study this problem. The IC on RDERS has produced a manual entitled "A Method for Evaluating the Protection Afforded by Buildings Against Fall-out." We have not received this manual. Further, the program of evaluating existing facilities is in a very preliminary stage; an initial survey of some sites was conducted, but ODM is not yet ready to request all departments and agencies to have their relocation sites surveyed until further experimentation and development is accomplished with a few selected sites. ODM has requested the IC to initiate with General Services Administration (GSA) and a few agencies a pilot operation to test procedures and techniques contained in new manual. GSA has agreed, if requested, to undertake on a reimbursable basis the task of making or supervising site surveys. Letter requests ODM be advised if we wish "to engage in this undertaking."

OBSERVATIONS:

Bureau relocation site at [redacted] being completely under our control is presently equipped with many facilities to minimize fall-out hazards, i.e., air conditioning filters incoming air; a supply of plastic material is maintained for inserting over holes caused by blast; technical equipment to evaluate the hazard is maintained at site and the site is continually being critically reviewed to further minimize hazard associated with nuclear explosions, for example, we are now conducting survey re feasibility of installing water filteration equipment.

Memorandum Mr. Belmont to Mr. Boardman
RE: BUPLANS - RADIOLOGICAL DEFENSE OF
EMERGENCY RELOCATION SITES (RDERS)

Field relocation sites in general are [redacted] b7E
[redacted] except during a national emergency. Consequently, many of the protective measures utilized at [redacted] site cannot be applied to field sites, however, all field sites are approved because of [redacted] therefore, we should not participate in a program which would subject our sites to evaluation by outside agencies. We should, however, have benefit of the contents of the manual referred to.

Since ODM letter is dated 10/14/57, was forwarded by routing slip, and not received in the Director's office until 11/13/57, it is believed letter should not be formally acknowledged in writing; that Liaison should orally acknowledge receipt of letter at the same time advising ODM we do not desire to engage in the survey but would appreciate a copy of the manual.

John O'Neill OPM so advised 11/22/57 gmt He will send manual by mail

RECOMMENDATION:

That Liaison orally acknowledge to ODM receipt of the letter dated 10/14/57 at the same time advising that we do not desire to participate in a survey of our relocation sites but that we would appreciate a copy of the manual entitled "A Method for Evaluating the Protection Afforded by Buildings Against Fall-out."

Monthly space for [illegible]

Attached undated letter from [redacted] C. & P. Telephone Company of [redacted], advises of an increase in the monthly charge for the ten telephone trunks on the [redacted], telephone exchange. Each of these trunks previous to the increase quoted in attached letter cost $72 per month in mileage charges plus $13.50, a total of $85.50 per month each or $855 for the ten trunks. Under the new rates each trunk will cost $72 per month mileage charge plus $17.25, a total of $89.25 each or $892.50 for the ten trunks -- a total increase of $37.50 per month, or $450 per year.

The ten trunks in question are the five trunks on the [redacted] and the five long distance (LD) trunks to [redacted]

I have discussed the matter with our switchboard supervisor, [redacted] states that all these trunks have not been busy at one time since the first operation alert exercise; that long distance calls can be placed from the relocation site over the Essex numbers if all the LD trunks are busy. As you know, we also have an eleventh trunk on our relocation site switchboard on the [redacted] exchange, [redacted] and I feel that one LD trunk, LD 24, could be discontinued without materially affecting the Bureau's capacity to make and accept long distance telephone calls from the relocation site. Long distance calls can be made from the Essex trunks as well as the LD trunks. The saving would be $89.25 per month or $1,071 per year, more than off-setting the monthly increase in rates on the remaining nine C. & P. trunks which amounts to $405 per year.

Memorandum to Mr. Nease 2-10-58

Re: BUPLANS - TELEPHONE FACILITIES
AT BUREAU'S RELOCATION SITE

RECOMMENDATIONS:

That long distance (LD) trunk 24 on the switchboard at the Bureau's relocation site be discontinued. If approved I will make the necessary arrangements to have the trunk taken out of service.

SEE ADDENDUM ON PAGE 3

ADDENDUM: 2-12-58 LEW:jw

The C&P Tel. Co. of [redacted] manager [redacted] cannot assure us that a trunk taken out of service now can be restored immediately at some indefinite future time. b6 b7C b7E

The Communications Section cannot assure that with or without the one trunk in question we would have enough trunks in a grave emergency. We consider our intra-bureau telephone communications facilities to be minimum, but not to extent that removal of only one LD trunk would materially affect emergency telephone communications. We could make long distance calls through [redacted] if we had to -- we have two land line and two microwave telephone channels off [redacted] switchboard to [redacted] now and ICS has indicated we can have more of the microwave channels if we desire them. We do not pay for the [redacted] circuits except for a nominal monthly charge to the local telephone company for connecting them to our switchboard which we lease from the local company under contract. We pay the telephone companies $20,930.00 per year for our telephone and teletype facilities at [redacted] $10,710.00 or one-half this amount is for the ten [redacted] trunks which now cost $1,071.00 each per year. b7E

Memorandum Beach to Parsons 4/18/57 denotes Laboratory determined from the Sanitation Engineering Branch of the Engineering Research and Developing Laboratory, [redacted] b7E that a water purification system had been designed which will remove from 50 to 85% of the dissolved fission products from 3,000 gallons of water in one hour. The specifications were being drawn up prior to its being put on the Federal procurement list, and this procedure was to take from 3 to 4 months.

RECOMMENDATION:

The Laboratory recontact the Sanitation Engineering Branch of the Engineering Research and Developing Laboratory, [redacted] b7E to determine if the specifications for the water purification system have been drawn up, to determine if the system is now available, to ascertain its cost as well as its practical applicability to its being made available at relocation sites of the Bureau and field offices.

Attached memorandum White to Parsons 10/14/57 recommends consideration be given to purchase of a filter-type piece of equipment in order to provide 1,500 to 3,000 gallons of radioactive free water per day in the event water supply at [redacted] should become contaminated from radioactive fallout in an emergency. Memorandum also recommends that SAC [redacted] make inquiries as to the availability of a small water pump and storage tanks at [redacted]

b7E

Laboratory estimates that such a setup would not cost over $1,000 if installed, and space needed would be mostly dependent on the size of the storage tank.

The purchase and installation of the filter and related equipment appears to have merit. However, it is felt that prior to any final determination SAC [redacted] in collaboration with the Laboratory should ascertain the definite cost of such an installation plus the availability of needed space.

b7E

ACTION:

Re Laboratory memorandum be forwarded to the Training and Inspection Division for SAC [redacted] to obtain definite cost figures for installation of the equipment plus a determination as to the availability of space.

Nease
Tele. Room
Holloman
Gandy

Memorandum Belmont to Boardman, 7-31-57, recommended that the Laboratory recontact the Sanitation Engineering Branch of the Engineering Research and Developing Laboratories (ERDL) to determine if specifications for their water purification system had been drawn up, to determine if the system is now available and to ascertain its cost as well as its practical applicability.

[redacted] Chief of the Development Section, Sanitation Engineering Branch, ERDL, was contacted at [redacted], relative to their water purification system which would remove from 50 to 85 per cent of dissolved radioactive fission products from 3,000 gallons of water in one hour. [redacted] advised that these mobile units which retail from $10,000 to $60,000 and which are now available were designed for emergency use by troops where there is no available treated or filtered water. Troops using such water would do so until they had received a tolerance dose of radiation at which time they would be removed from the area. [redacted] further advised that an ordinary water filtration system such as presently in use at the [redacted] base would also remove from 50 to 85 per cent of dissolved radioactive fission products from the water. He advised that a simple device known as an ion-exchange chamber or tower, when inserted in a line after the water had been filtered in the normal fashion, will remove approximately 99 per cent of solid and dissolved radioactive materials from the water. ERDL does not have such units designed at this time.

b6
b7C
b7E

ENCLOSURE

It has been determined by the Laboratory that such units are commercially available and range in price from approximately $250 to several thousand dollars, depending on the volume and rate of water to be treated. For proper and most effective use as a remover of radioactive materials, it is necessary to have an analysis of the water to be treated

80-737

Memorandum to Mr. Parsons
Re: Defense Plans - Removal of
Radionuclides from Water
80-737

in order that the proper resins can be selected for use in the ion-exchange unit. In this regard, the Permutit Company, 330 West 42nd Street, New York City, New York designed and built the present water filtration system at [redacted] This same company is one of the main manufacturers of ion-exchange units and it would not be necessary to have the water at [redacted] analyzed since they have already made a complete analysis of this water supply. b7E

A laboratory-size ion-exchange tower, approximately 6" in diameter by 18" high, capable of supplying between 1,500 to 3,000 gallons of 99 per cent radioactive free water per day can be obtained for approximately $250. Since the resins in the unit become saturated with contaminants, they can be regenerated by chemical means or they can be substituted with replacement units which cost $15 a unit. In addition to the ion-exchange unit, it would be necessary to install a pump, auxiliary plumbing, and storage tanks. Such a setup would not cost over $1,000 if installed [redacted] Similar installations in the field office relocation sites do not appear to be practical since this would entail many water analyses, the use of expensive Geiger counter monitoring equipment, and the training of monitoring personnel. b7E

RECOMMENDATIONS:

That consideration be given to the purchase of a laboratory-size ion-exchange tower from the Permutit Company for installation in the Bureau relocation site at [redacted] in order to provide from 1,500 to 3,000 gallons of radioactive free water per day in the event that the water supply at [redacted] should become contaminated from radioactive fallout in an emergency. b7E

It is also recommended that SAC [redacted] make inquiries as to the availability of a small water pump and storage tanks at [redacted] The space needed at [redacted] would be mostly dependent upon the size of the storage tank. b7E

SUBJECT: DEFENSE PLANS
REMOVAL OF RADIONUCLIDES
FROM WATER

Reference memorandum Roach to Belmont, October 24, 1957. A survey was made by the Laboratory and SAC [redacted] of the existing water system in [redacted] It was determined that no existing facilities could be adapted to accommodate the previously recommended ion-exchange water filter for removing radionuclides from the drinking water. It is necessary to purchase a water storage tank for the purpose of storing the treated radionuclide-free water.

b7E

It has been ascertained that a vertical cylindrical 120-gallon size water storage tank, measuring 24" in diameter by 66" high, can be purchased locally for approximately $80 from [redacted]

b7E

The water leaving the filter will not be under line pressure and it would be desirable to have the ion-exchange unit mounted above the storage tank in order to fill the tank by gravity flow.

NOT RECORDED
141 APR 1 1958

The following two points should be kept in mind:

1. The filtering unit and storage tank can be installed anywhere within the building on an existing cold water line where space permits.

2. The filtering unit will purify the water of most contaminants encountered in [redacted] and could be used in any emergency when the water is contaminated and it is not restricted to radionuclides.

b7E

RECOMMENDATION: That SAC [redacted] appraise the above with respect to [redacted] and comment.

APR 1 1958

SUBJECT: BUPLANS - COMMUNICATIONS
EMERGENCY RELOCATION SITE

Attached is a letter from Department of the Army, Office of the Chief Signal Officer, Security Officer, concerning ~~15~~ 20 Bell Telephone Laboratory personnel who will be installing and equalizing the lines in connection with the crypto telephone service being installed in our relocation headquarters by the Interagency Communications System. The date and place of birth and the security clearance for each of these employees is given. I am forwarding a copy of this memorandum and a copy of the incoming letter to [redacted] immediately. b7E

RECOMMENDATION:

That the Service Unit run a name check on these individuals for subversive references only.

Enclosure

1 - [redacted] Sent separately with the memo. b7E
1 - Mr. Boardman
1 - Mr. Belmont
1 - Mr. Minnich

BRIEF SURVEY
REMOVAL OF RADIONUCLIDES
FROM WATER

Reference is made to the memorandum from White to Parsons dated 2/5/58.

I have discussed this matter with Mr. W. R. Heilman of the Laboratory and undoubtedly we can obtain a storage tank for filtering water more economically from [redacted] than it could be purchased on the outside. Such a unit as described in referenced memorandum will not require too much space for installation and we are tentatively planning to place the system [redacted] b7E b7E

RECOMMENDATION:

It is recommended that the Laboratory obtain the filtering unit and after its receipt at [redacted] we can make the installation according to the Laboratory's recommendations.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Mr. D. J. Parsons

DATE: February 27, 1958

FROM : B. J. White

SUBJECT: DEFENSE PLANS
REMOVAL OF RADIONUCLIDES
FROM WATER

Tolson
Parsons
Rosen
Clayton
Tele. Room
Holloman
Gandy

Memorandum White to Parsons October 14, 1957, sets forth details relative to the availability and practicability of a water purification system to be installed [redacted] for the removal of dissolved radioactive fission products from the drinking water in the event of an emergency. This memorandum recommended that consideration should be given to the purchase of a small, relatively inexpensive ion-exchange tower capable of providing from 1,500 to 3,000 gallons of radioactive free water per day. This memorandum also recommended that SAC [redacted] conduct a survey [redacted] to find adequate space and to determine if necessary accessories were available.

b7E

Memorandum White to Parsons of February 5, 1958, advised that after a survey of the existing water system in [redacted] by the Laboratory and SAC [redacted] it was determined that no existing facilities could be adapted to accommodate the ion-exchange tower and necessary storage tank and that it would be necessary to purchase a water storage tank. This same memorandum advises that the filtering unit and storage tank could be installed anywhere [redacted] where space permitted.

b7E

NOT RECORDED
141 APR 1 1958

Memorandum [redacted] to Tamm February 11, 1958, advises that a storage tank can be very economically obtained from the [redacted] and that it was tentatively planned to install the system [redacted]

As a result of the studies and surveys made, it appears that a very practical, relatively simple water purification system can be easily installed [redacted] for the purpose of providing radioactive-free drinking water in the event of an emergency. This system will purify the water of most contaminants and is not restricted to radioactive particles and, therefore, could be used in any emergency wherein the water is contaminated.

b7E

A suitable ion-exchange tower approximately 18" high and 6" in diameter can be purchased for approximately $25.00.

Memo to Parsons
Re: DEFENSE PLANS
REMOVAL OF RADIONUCLIDES
FROM WATER

Plastic resin refills, to be used when the ion-exchange unit becomes saturated with contaminants, can be purchased for approximately $15.00 each. A water storage tank can be obtained for approximately $75.00. The installation of this system would be relatively simple costing in the neighborhood of $50.00. The complete system installed would, therefore, cost under $500.00.

It is pointed out that for the most efficient use of the ion-exchange tower it is necessary to have the water supply analyzed in order to select the proper plastic resin. Permutit Company, one of the principal manufacturers of ion-exchange units, designed and built the present water filtration system for [redacted] and has an analysis of the water at [redacted] on hand. b7E

RECOMMENDATION:

That an ion-exchange tower and replacement resins be purchased from the Permutit Company, 330 West 42nd Street, New York City, New York, at an approximate cost of $250.00. Upon receipt of the items [redacted] will be contacted to obtain the necessary storage tank and to make further arrangements for the complete installation according to the Laboratory's recommendations. b7E

Purpose of this memorandum is to reflect completion, with our assistance, of two days of training in FBI and Interagency Communications System (ICS) codes by following listed Firearms Instructors [redacted] who had not been afforded this training previously: [redacted] RONALD L. MALEY and [redacted]

These men are now sufficiently familiar with all FBI codes, including [redacted] one-time cipher pads and "Y" systems, to independently handle code messages in these systems in an emergency. They are also capable of assisting with the various ICS "on-line" machine systems now held at [redacted]

b6
b7C
b7E

The interest and achievement of the above-listed agents in this rather difficult, concentrated code training were outstanding.

ACTION:

For information.

We have been advised informally by [redacted] Referral/Consult [redacted] equipment now installed at [redacted] for use by the Bureau in the ICS network. b7E

As you may recall, [redacted] was recently transferred from St. Louis to [redacted] to handle maintenance and repair of electronic and crypto-equipment held there for emergency relocation use. [redacted] is already trained in maintenance of [redacted] It appears logical to have him also trained in remaining crypto-equipment held at [redacted] as an emergency back-up to ICS maintenance responsibilities.

66-17511-1
NOT RECORDED
141 APR 21 1958

RECOMMENDATIONS:

1. That technician [redacted] assigned to [redacted] be authorized to attend 4-weeks' training at [redacted] Washington, D. C., at no cost to the Bureau, beginning May 5, 1958 in maintenance and repair of [redacted] Referral/Consult

2. That training of [redacted] *in basic Teletype and the* [redacted] *be authorized, arrangements for such schools to be made for training subsequent to August 1, 1958, in view of heavy work schedule for* [redacted] *prior to next Operation Alert in July, 1958.* b6 b7C b7E

OK 3/18/58

I am in agreement with recommendations as set forth.
R. L. Miller 3/17/58

ADDENDUM OF ADMINISTRATIVE DIVISION LLD:llw 3/21/58

The personnel file of RTO [redacted] **has been reviewed. He Entered on Duty 4/6/42, was on Military Leave 5/1/44 to 2/18/46 and returned to duty on the latter date. He has been in radio work during his entire employment by the Bureau. His services have always been satisfactory and he has never been subject to administrative action. On his last performance rating he was rated "Excellent". There does not appear to be any reason why he should not receive the training mentioned above and it would be to the advantage of the Bureau to have him do so.** b6 b7C

RECOMMENDATIONS:

That RTO [redacted] **be approved to receive the training set forth above.** b6 b7C

A PERMANENT BRIEF OF THE PERSONNEL FILE OF RTO HAWN IS ATTACHED.

STANDARD FORM NO. 64

Office Memorandum • UNITED STATES GOVERNMENT

TO : Mr. L. V. Boardman

DATE: April 16, 1958

FROM : Mr. A. H. Belmont

SUBJECT: BUPLANS - Auxiliary Space for Seat of Government
EMERGENCY EVACUATION

Tolson
Nichols
Boardman
Belmont
Mohr
Parsons
Rosen
Tamm
Trotter
Nease
Tele. Room
Holloman
Gandy

Since early 1956, designated Bureau employees at Seat of Government, [redacted] and [redacted] Offices have been designated responsibilities in connection with the emergency relocation of certain Bureau officials and the Attorney General during a period of emergency. Initially and subsequently, certain documents, classified and unclassified, have been made available to the employees having these primary responsibilities. Classified documents issued and frequently replaced by memorandum or letter have been: (1) a list of Emergency Relocation Sites of Other Government agencies, (2) Map, "Relocation Sites, Key Agencies," (3) Chart A, "Routes to [redacted]" (4) Chart B, "Route to [redacted] (5) "Relocation Site Routes," (6) "Civil Defense Evacuation Routes, Washington Metropolitan Area." Items one through five are classified ~~"Top Secret,"~~ and item six is unclassified. Since inception of this program, these documents have undergone frequent changes and consolidations. Also, there have been frequent redesignations of the employees involved necessitating several transfers of the documents to the key designated employees. b7E

OBSERVATIONS:

In order to insure that current designated employees are in possession of up-to-date documents, each employee involved should receive one copy each of the following: (1) List of Relocation Sites of Other Government agencies," up to date as of 3/19/58, (2) "Relocation Sites, Key Agencies," dated 3/27/58, (3) "Relocation Site Routes" dated 7/1/57,

(4) Chart A, "Routes to [redacted] dated 7/1/57, (5) Chart B, "Route to [redacted] dated 7/1/57, (6) "Civil Defense Evacuation Routes, Washington Metropolitan Area." Items one through five are classified ~~"Top Secret,"~~ and item six is unclassified. b7E

RECOMMENDATIONS:

(1) That each recipient of a copy of this memorandum substitute the attached documents for documents now in their possession and destroy all documents relative to this program which are now possessed by them. Also, that all ~~"Top Secret"~~ documents must be maintained in accordance with instructions set forth in Executive Order 10501, but they should be available for possible immediate use.

(2) Attached letter to [redacted] Field and [redacted] field offices enclosing sufficient copies of documents for use of designated employees, these offices, be sent. b7E
